Why Education ?

Without education, there is no development.

The impact of low education for any country economy weights more than the impact of peoples income.

Education is more than learning of available, known information.

The behaviour of good educated persons is characterised through the enhanced understanding of interrelations and therefore improved in all respects.

Good education is the base for positive development of the community in general.

Education for Kenya

It was the friendship between Father Augustine Lape Okoth and Rolf Jost which lead to ideas and in the following to the establishment of a new association:

“Bildung für Kenia e.V.” translated

”Education for Kenya e.V.“

We patronize only girls. Our focus is the support of school education making use of available structures and institutions in Kenia.

Why women and girls?

“Equal chances for all gender.” This is a phrase; it does not mean anything if there is no prospective for women education and profession.

Educated women make a step ahead to become breadwinners for their family.

Good educated women will actively contribute to the family planning.

Children of educated mothers are healthier.

Women realise the centre of their families. Therefore, they are the ideal origin to endow experience and knowledge. This alternative role to the typical motherhood opens new perspectives.

Who are we?

“Bildung für Kenia e.V” is an association, registered with number VR 3573 at the court of Heilbronn.

We are a high motivated group of people with the committed goal to improve, for girls , the chance for a better future.

Actually we count 9 members

Executive: Rolf Jost, Veronika Plischke

Members: Dr. Sonja Lira, Ebru Dülger
Lars Marschner, Claus Roth, Sabine Leidner, Evelyn Lebküchner

In Kenya: Rev. Augustine Fr. Lape Okoth

What are we doing?

Education for Kenya e.V. provides direct support to talented girls.

On short and transparent transaction way, we use out available budget for school fees, catering, clothes, learning aids, food.

For us important

- Adequate support
- Reachable goals
- Full cost transparency
- Connection to Kenya
- Presentation of our activities
- Finding friends for our idea

What to do?

We improve the future prospects for Kenyan girls. We finance school and give support when choosing a profession. Often the potential of girls is sadly ignored – actually, our budget allows to promote the ability of four girls.

Being in profession, we want our students being available for the association to share experience and connections.

We want to establish a network of relationships between schools, companies, shops and organisations
